Revenue by Category

Category	Consumer	Corporate	Home Office	Total
Furniture	111,553.54	61,416.52	46,342.87	219,312.93
Office Supplies	115,191.47	97,974.20	40,669.76	253,835.44
Technology	108,166.92	88,853.39	75,398.86	272,419.17
Total	334,911.93	248,244.12	162,411.49	745,567.53

Consumer is the leading segment and Technology the leading category for the selected year, consistent with the all-time pattern shown on the Executive Summary. The breakdown table shows exactly how each product category performs within each customer segment — useful for spotting which combinations (e.g., Technology + Consumer) drive the most revenue.

(Use the year filter above to see how this shifts year to year.)

Revenue by Regional Manager

Revenue by Country

Country ● United States ● Canada

The United States drives the vast majority of both revenue and profit, with Canada contributing a small fraction by comparison — see the table for exact margins by country, including Canada's slightly higher profit margin despite lower volume. Regional manager rankings can shift depending on the selected year; see the chart above for the current year's leaderboard.

(Use the year filter to compare performance across years.)
